advantageously used. If unused, the loss in value at 4 per cent, will be \$10,000 per annum. The present pumping capacity at the old pump-house is seven million gallons; average daily use, four million gallons—often used to full capacity. When the settling hasins are brought into use, the whole supply of water for the city will have to be delivered from these basins by pumps located at the new pump-house. At present one-third of the whole supply is delivered from the old pump-house, which cannot be connected with the settling basins excet at great cost. It is therefore necessary to increase the pumping capacity at the new works.

Cottum was at this time confined to his home with sickness, and that the sulary that he would draw is now being paid to the man who takes his place. Cliff Elder is acting as stationman in Mr. Cottum's

salary.

Assemblyman Jones and Aldermen Redd and Hooker argued that the city should pay the fireman while he is sick, and should also pay the person who takes his place. It was brought out in the argument that the firemen who drew salaries could sleep all night, and then do work in the day, and that they should not expect pay when they were off.

After a good deal of discussion, it was found that the commissioners could not act in the matter, and an adjournment was taken while the question was still before the body.

Mossrs, J. H. Roark, William Ashbrook and J. H. Marskall were all stopped by the man and were all threatened. The drunken man didn't want money, and didn't seem to want anything except to create a disturbance.

When he had been folled in all three of his attempts the police were notified that a wild man was roaming on Perry Street, and Sergeant Wright and Officer Moore went on the warpath. They found Craig on the Free Bridge and brought him to the station house.

Yesterday he was balled, and the oharge against him this morning will only be that of disorderly conduct.
